PROFESSIONAL SUMMARY

Full Stack Software Engineer with 3+ years building production web applications on the MERN stack, AWS serverless, and blockchain. Delivered 15+ REST APIs and microservices with Node.js, Express.js, React.js, Next.js, and TypeScript for e-commerce, healthcare, and Web3 products, cutting page load times by up to 50% and production defects by 40% through performance tuning, code review, and CI/CD on PostgreSQL, MongoDB, Redis, and Docker.

TECHNICAL SKILLS

Languages:	JavaScript, TypeScript, Solidity, SQL, HTML5, CSS3
Frontend:	React.js, Next.js, Redux, Material UI, Tailwind CSS, Bootstrap, Three.js
Backend:	Node.js, Express.js, Moleculer.js, BullMQ, REST APIs, GraphQL, WebSockets, Microservices
Databases:	PostgreSQL, MongoDB, Mongoose, Redis, DynamoDB
Cloud & DevOps:	AWS (Lambda, RDS, DynamoDB), Serverless, Docker, Kubernetes, Terraform, CI/CD, Linux
Blockchain:	Solidity Smart Contracts, Ethers.js, Web3, Wallet Integration, RPC Indexing, NFTs, Ethereum
Testing:	Jest, Unit Testing, Integration Testing, Code Review
Tools:	Git, GitHub, Jira, Postman, VS Code, npm, Agile / Scrum

PROFESSIONAL EXPERIENCE

Full Stack Software Engineer | Birmment

August 2025 - Present

- Led full-stack delivery of 2 enterprise products: a blockchain indexer and an AWS serverless healthcare and e-commerce platform, owning architecture, APIs, and deployment.
- Architected microservice backends with Node.js, Moleculer.js, BullMQ, PostgreSQL, and Redis, serving 3 client channels (web, Android, WebSocket) from one REST API.
- Containerized services with Docker and Kubernetes and built CI/CD pipelines with Jest and structured peer code reviews, reducing production defects by 40%.
- Shipped 20+ REST API endpoints powering inventory and order workflows for frontend and mobile teams.
- Mentored 2 junior developers and established code-review standards, improving pull-request turnaround by 25%.

MERN Stack Developer | Exec9

June 2024 - July 2025

- Delivered 6+ full-stack applications across e-commerce, CMS, and Web3 using MongoDB, Express.js, React.js, and Node.js, serving thousands of users.
- Deployed 5+ Solidity smart contracts with wallet integration for NFT and DeFi platforms, from local testing to mainnet release.
- Engineered REST and GraphQL APIs, MongoDB schemas, and 10+ third-party integrations (payment, content, blockchain) for checkout and on-chain workflows.
- Launched responsive React UIs with reusable components, improving page load performance by 30%.

React.js Developer | Explore Logics

July 2023 - May 2024

- Migrated legacy HTML and WordPress sites to React.js, reducing page load times by 50% and cutting maintenance effort by 35%.
- Built and maintained 8+ client-facing web applications to product and design specifications.
- Optimized cross-browser compatibility and responsive layouts across 5+ browsers and all device sizes.
- Partnered with design and product teams to deliver features across two-week agile sprints for 10 months.

PROJECTS

Verana - Blockchain Crawler & Indexing System | Birxment

Node.js, Express.js, Moleculer.js, BullMQ, PostgreSQL, Redis, Docker, Jest, REST APIs, WebSockets

- Constructed a blockchain indexer that ingests 10,000+ blocks via RPC and decodes protocol transactions, eliminating 90% of direct on-chain reads.
- Orchestrated BullMQ microservice pipelines with sub-second sync across 3 client channels (web, Android, and WebSocket).
- Hardened production stability through Dockerized PostgreSQL and Redis, CI/CD, and Jest test coverage.

HealOps - Multi-Tenant Healthcare & E-Commerce AWS Platform | Birxment

AWS Lambda, DynamoDB, RDS, Terraform, Snowflake, Node.js, Serverless

- Developed a multi-tenant cloud platform serving 5+ warehouse, vendor, and store tenants with inventory and order workflows.
- Provisioned 12+ AWS resources as code with Terraform and serverless Lambda services.
- Integrated Snowflake analytics pipelines with AWS data services, enabling reporting across 4 business domains.

UniLabs - Blockchain Web Platform | Exec9

Next.js, Solidity, Ethereum, Ethers.js, Three.js, Framer Motion

- Released a Web3 platform with interactive 3D UI and Ethereum-based user flows for 1,000+ monthly active users.
- Implemented Solidity smart contracts and wired React components to contract methods for on-chain transactions and live state reads.

Senzi - Dropshipping E-Commerce Platform | Exec9

Next.js, Node.js, MongoDB, REST APIs, Third-Party Integrations

- Connected a dropshipping platform to 2 external provider APIs (1688, Taobao) with automated catalog sync for 5,000+ SKUs.
- Streamlined catalog, order, and provider workflows through MongoDB-backed services, reducing manual order handling by 60%.

DMACQ Forms - Dynamic Form Management System | Exec9

Next.js, Microservices, REST APIs

- Assembled a Next.js UI over 4 microservices for a dynamic form builder, processing 500+ live submissions per day.

EDUCATION

Bachelor of Computer Science | University of Education

October 2019 - June 2023

LANGUAGES

English: Professional Working Proficiency | Urdu: Native
